Reusable Solid Rocket Motor Team Receives EPA Award

The Environmental Protection Agency has awarded NASA's Space Shuttle Reusable Solid Rocket Motor team a "Best-of-Best" award. The Marshall-managed project is one of 71 honored this year for outstanding contributions to protect the Earth's stratospheric ozone layer -- which shields the Earth from ultraviolet radiation harmful to life. Team members from Marshall and Thiokol Corporation of Ogden, Utah, recently accepted the award at ceremonies in Montreal.

CFC Total Exceeds \$378,650

After four weeks of the Combined Federal Campaign to raise money for charities, pledges and donations already total \$378,652. Seventy-one percent of employees have contributed to the campaign. The average gift per participant is \$189.

Program Development Moves to Fifth, Sixth Floors of Bldg. 4203

The Program Development Directorate is moving from the fourth floor of Bldg. 4200 to Bldg. 4203. The Preliminary Design and Program Planning offices have already moved to the sixth floor of Bldg. 4203. The Program Development and Advanced Systems and Technology offices are scheduled to move to the fifth floor of Bldg. 4203 around mid-December. Employees' telephone numbers will remain the same.
